ABSTRACT

Data on federal funding to two-year colleges are provided in this report for fiscal year (FY) 1982. After introductory material on the development and uses of the report, tables provide financial data for the federal categorical aid programs of the following units: (1) University Year for Action; (2) Department of Education--Educational Research and Improvement, International Education, Postsecondary Education, and Vocational and Adult Education; (3) Department of Energy--Educational Program Division; (4) Department of Health and Human Services; (5) Department of Labor; (6) National Endowment for the Arts; (7) National Endowment for the Humanities; (8) National Institute of Mental Health; and (9) National Science Foundation. For each federal funding program, the report provides FY 1982 figures contrasted with FY 1981 figures for dollars authorized, dollars appropriated, dollars obtained by two-year colleges, total number of awards, total number of proposals submitted, number of awards to two-year colleges, and number of proposals submitted by two-year colleges. Finally, a summary of FY 1982 funding and a prospectus for FY 1983 are presented for each program, revealing that a lesser amount of money and a reduced number of programs were available to two-year colleges for FY 1982 and that funding reductions will continue in 1983 as some programs are phased out and others are absorbed into block grants. 82 FISCAL YEAR

JC 830 155

PREFACE

The seventh annual report on Federal Funding for fiscal year 1982 was prepared by the Task Force Committee of the National Council for Resource Development, and affiliate Council of the American Association of Junior/Community Colleges. The committee, under the leadership of Bill Davis, Chairperson, and Sandra Edwards, Vice-Chairperson, from Wilkes Community College, Wilkesboro, North Carolina, are to be commended for their many hours of dedication and commitment that went into the preparation of this report. The chairperson, vice-chairperson, and committee members have provided a valuable service to the membership and have helped to advance the Council toward its goal of equitable funding from federal sources for two-year colleges.

In addition to spending many hours collecting data, committee members made a special effort to strengthen working relationships with agency personnel. The Council has made an impact on many funding agencies as a direct result of personal contacts being made by the Task Force Committee members over the year. The federal program officers are more aware of the needs and concerns of community/junior colleges and recognize the ultimate goal of the Task Force report is increased funding awards for community/junior colleges.

The report will be a valuable tool to the degree that resource development officers use it to determine which federal categorical aid programs have a funding potential and address their institutional needs. The following data is provided for each selected federal funding program: dollars authorized, dollars appropriated, dollars obtained by two-year colleges, total number of awards, total number of proposals submitted, number of awards to two-year colleges, and number of proposals submitted by two-year colleges. A brief analysis of the data and a forecast is provided for Fiscal Year 1983.

Wide distribution of the report occurs at the Annual NCRD Federal Affairs Workshop. In addition, the report is distributed to key congressional members and staff. We, as college development officers, must also see that our senators and representatives are aware of the report and understand the statement it makes regarding funding for the two-year colleges.

We must continue to communicate the mission, capabilities, and needs of community/junior colleges to key decision-makers. I challenge each of you to strive diligently to become more professional in proposal preparation, agency cultivation, and legislative oversight.

Again, special appreciation is expressed to Bill Davis, Sandra Edwards, and the Task Force Committee for their support of council objectives and the professional quality of the report.

A. Lin Stefurak, Ph. D. NCRD President 1982

ACKNOWLEDGEMENTS

Through the dedication, professionalism, and hard work of twenty-two National Council for Resource Development members, forty-two federal agency personnel, and other supportive individuals, the Federal Funding to Two-Year Colleges for Fiscal Year 1982 has been compiled and produced.

The Federal Funding Task Force Committee visited the federal agencies in Washington, D. C. on October 6, 7, and 8, 1982. The Task Force members, their assignments, and colleges represented are given below.

All federal agency personnel contacted by Task Force members gave their assistance willingly to help make this report as complete and accurate as possible. Special appreciation is extended to them.

Cover art was provided by Sherry Dancy of Wilkes Community College.

The voluminous, detailed task of preparing this material for the printer was ably handled by Brenda Shepherd of Wilkes Community College. Also, Magdalene Wall and Beth Shepherd, both of Wilkes Community College, assisted in corresponding with Task Force members and agency personnel. Special appreciation is extended to Brenda, Magdalene, and Beth.

Printing was by Nu-Line Printing and Photography Company of Elkin, North Carolina.

Chairing the Task Force for this report was Dr. Bill H. Davis, Director of Resource Development, Wilkes Community College, Drawer 120, Wilkesboro, NC 28697, phone (919) 667-7136. Assisting Dr. Davis was Vice-Chairperson Sandra Edwards, Resource Development Officer, also of Wilkes Community College.

Special appreciation is given to Dr. David E. Daniel, President of Wilkes Community College, for providing the support necessary for Bill Davis and Sandra Edwards to serve on the Task Force.

INTRODUCTION

The Federal Funding to Two-Year Colleges Fiscal Year 1982 report was compiled through the joint efforts of twenty-two volunteer NCRD members and forty-two federal agency representatives. Information contained in this report is designed to provide as comprehensive a picture as possible of funding by federal agencies directly to two-year colleges. When used as a resource tool, the data provided will assist the development officer in identifying potential funding sources as well as assess the probability of receiving proposed funding.

This report in no way seeks to include all programs in the Catalog of Federal Domestic Assistance for which two-year colleges are technically eligible, but rather includes as many programs as possible that have funded two-year colleges in the recent past or are presently funding two-year colleges. The funding period covered by this report is October 1, 1981, through September 30, 1982, unless otherwise noted.

Data is provided on charts that identifies funds received by two-year colleges during Fiscal Year 1982. Comparative data for Fiscal Year 1981 is provided in parentheses. A summary and analysis is included that reflects the perceptions taken from interviews with agency representatives. Projections for Fiscal Year 1983 are included in the prospectus.

If there are any questions about the report, contact the Chairperson or Vice Chairperson. If additional copies of the report are needed, contact the NCRD National Office Secretary: Karen Griffith, NCRD Suite 410, One Dupont Circle NW, Washington, D. C. 20036. Phone 202-293-7050.

a. Due to budget limitations, the determination was made by DOL to discontinue the Job Corps Advanced Career Training Program at the end of FY 82. For FY 82, Job Corps Advanced Career Training Program funds were distributed to 10 Job Corps Regional Offices. Funds were utilized to provide corpsmembers who had been enrolled in Job Corps over 90 days with the opportunity for advanced training in areas beyond the design of traditional Job Corps programs. Proposals were not requested for these funds. Contractual agreements for these advanced slots were developed by Job Corps Regional Office who selected the colleges and vocational schools to train corpsmembers. The colleges and vocational schools were selected based on the availability of training desired by corpsmembers and not available at Job Corps centers, the school or college's entry requirements, the cost of the training, the availability of housing for the corpsmembers, and other relevant factors.

a. In a pioneering program involving the donation of equipment by private industry, the NSF through the DISE program, selected 58 research teams to conduct experimental projects aimed at improving science and engineering education at the 10th, 11th and 12th grades and early college levels.

The researchers explored ways that computers and other information handling techniques can help students learn science and engineering.

Computer equipment needed for 52 of the 58 projects was donated to the grantees by Radio Shack; Atari Institute for Educational Action-Research, the Digital Equipment Corp.; IBM Corporation; and the Apple Education Foundation.

(cont.) Each company provided computers and related hardware, technical information about the equipment, and expert assistance so that the computers could be used to best advantage in the projects.

NSF funding for research under the program was $855,668. The total value of the equipment donated by the five companies is an additional $947,217. Grantee institutions, which had to provide at least a quarter of the project cost to receive an NSF award, contributed about $800,000. Additional money for several of the projects was provided to the institutions by local businesses and industries convinced about the future of education in the U.S.

SUMMARY, ANALYSIS, AND PROSPECTUS FOR FY 1983

INTRODUCTION: Reorganization, program cutbacks, and block grants were the main theme for federal funding during Fiscal Year 1982. A lesser amount of money and a reduced number of programs were available to two-year colleges.

Funding will be available during FY 1983 to two-year colleges through Federal Agencies and State Block Grants. However, it appears that funds will be reduced in many programs. Some programs are being phased out, while others are being absorbed into Block Grants.

It is imperative that we make the needs of two-year colleges known. We must lobby at the federal and state levels to tell the story of our institutions. Special efforts must be made to affect administrative decisions so that block grant funds will be available to two-year postsecondary education institutions.

The following data was compiled from interviews with federal agency personnel by a twenty-two member NCRD Federal Funding Task Force:

ACTION: The University Year for Action went out of existence on September 30, 1982. Agency personnel do not believe the program will be resurrected or funded in the future. It is expected that Foster Grandparents, Senior Companions, and RSVP will continue to be funded under Action.

DEPARTMENT OF EDUCATION — EDUCATIONAL RESEARCH AND IMPROVEMENT: Minority Institutions Science Improvement Program (MISIP) — At the time of this writing, the Administration is recommending a reduction in this program's budget from the present $4.8 million to $3.3 million for FY 1983.

According to the director of this section, such a move would result in a 24 percent reduction in grant dollars awarded. The director indicated that two-year colleges had become more competitive in the grants process by writing better proposals and by more submissions. More faculty involvement in the proposal preparation by two-year colleges was recommended.

Approximately 25 percent of the program's appropriation goes for special projects, with 75 percent going to institutional projects. This is not a mandated ratio. Urban public community colleges have not been as competitive due to a large number of part-time faculty and a high rate of transition, according to the director.

Office of Libraries and Learning Technologies Title II-A — The continuation of Library Title II-A is questionable. The administration has requested that no funding be appropriated for the program, but there seems to be some sentiment in Congress to support the program near or at the current FY 1982 level of $1,920.000. However, the staff at II-A still plans for funding applications to be distributed by November 1, with a tentative submission date of mid-December.

The staff indicated that since the II-A program is a discretionary program, it would not be consolidated into the block grant program. When Congress lowered the FY 1982 appropriation, it resulted in appropriations of $840 each to applicant institutions. It is extremely doubtful this amount will be raised.

While the II-A program is authorized until 1985, a FY 1983 appropriation may be in question. Congress will need to decide on the appropriation question by mid-December in order for the staff to have time to make the awards.

DEPARTMENT OF EDUCATION-INTERNATIONAL EDUCATION: The Administration has requested cuts for FY 1983 that would reduce the Fulbright Programs from $4.8 million in FY 1982 to $1.5 million. The International Research and Studies Program

would be reduced from $1.1 million in FY 1982 to $216,000 for FY 1983. The Foreign Curriculum Consultants Program would be abolished should the Administration's requests be approved.

However, the general opinion seemed to be that the Administration's budget cut proposals will not be supported by Congress. The International Education Programs would be operated under continuing resolutions for FY 1983 at the same funding levels as in FY 1982, which would be considerably higher than the Administrations's proposals. Because the appropriations are not yet settled, the program staff will be sending out 1983 application materials with the disclaimer that proposals will be reviewed and grants awarded should funds be available. Those staff interviewed recommended that colleges go ahead and apply regardless of the disclaimer.

Only the Teacher Exchange Program is not expected to be adversely affected by the current budget proposals. The staff of this program noted that exchanges with Korea and Italy are priorities for FY 1983.

Finally, the program officers voiced their praise for the community college role in higher education and for the quality of two-year college grant proposals. Several staff members viewed the community colleges as the leaders in postsecondary education in the next decade. In line with these reactions, the staff encouraged community colleges to submit more proposals and offered assistance in reviewing concept papers and in making successful funded proposals available for examination in program offices.

DEPARTMENT OF EDUCATION — POSTSECONDARY EDUCATION: Special Programs for the Disadvantaged — The Administration's budget for FY 1982 for Special Services calls for funding of $57.4 million. Upward Bound would receive $24.9 million, a substantial reduction. No funds are budgeted for Educational Opportunity Centers, Talent Search, or Training; however, there is optimism that Congress will appropriate additional funds. The staff does not expect any changes in the regulations or the application process for the immediate future.

Institutional Aid Programs (Title III) — The Institutional Aid Programs have just undergone major program changes, and additional changes are not anticipated in the near future. The programs have high two-year college participation, and this trend is

expected to continue. The new regulations assure minimum funding for two-year institutions, and funding for FY 1983 is expected to exceed those minimum levels. Of the 960 applications submitted for FY 1982, 887 were eligible for consideration.

Handicapped Personnel Preparation Program — The Handicapped Personnel Preparation Program is in the process of proposing substantive changes in program guidelines. These new proposed regulations should be reviewed and commented upon by two-year colleges when they are published in the *Federal Register*. This program has a history of funding a high percentage of two-year college applicants and warrants consideration.

Veteran's Cost-of-Instruction Program (VCIP) — The Educational Amendments of 1980 authorize the VCIP program through 1985. Approximately 59 percent of program funds go to two-year colleges. All institutions that apply by the deadline are funded. Appropriated funds for FY 1982 represent less than 5 percent of the amount called for by legislation, so funds are pro-rated to colleges. Funds are awarded by formula and are based on the number of enrolled veterans. The staff is optimistic that funding for FY 1983 will be maintained at the current level.

Postsecondary Community Service and Continuing Education — The Postsecondary Community Service and Continuing Education program technically no longer exists. Under the Educational Amendments of 1980, the types of activities of this program were included in a new package which consists of Educational Outreach, Undergraduate Academic Facilities, and State Student Incentive Grants. The Incentive Grants program is the only component currently funded.

Cooperative Education Administration — Although at this time no funds have been appropriated for FY 1983 for Cooperative Education, the staff feels that the program will be funded at the FY 1982 level. Because of the accelerated matching requirement and the scarcity of state and local funds, some colleges are backing out of the program. The Cooperative Education Supplemental Fund program has been operating for the past two years. It is a highly competitive formula-based grant program which reallocates 50 percent of the funds left over in the Federal College Work-Study Program. Approximately $1.5 million was available for the Supplemental Program last year. A fact book on the history and current status of Cooperative Education is available upon request.

Fund for the Improvement of Postsecondary Education (FIPSE) — The Fund for the Improvement of Postsecondary Education (FIPSE) is not a program in which large numbers of two-year institutions have traditionally participated. In FY 1982, only 12 percent of the applications were from two-year colleges and an even smaller percentage — 7.4 percent — of the projects funded were from that group. FIPSE continues to encourage more two-year colleges to apply and stresses the need for a high quality of applications due to intense competition. While funding of FIPSE was cut from FY 1981 to FY 1982, most staff feel that funding will remain stable for the immediate future.

DEPARTMENT OF EDUCATION — VOCATIONAL AND ADULT EDUCATION: Agency directors and staff strongly recommend that appropriate college personnel utilize the services and information available at their state offices. With the consolidation of programs under the Omnibus Reconciliation Act of 1981, it is imperative that close communication be established with state agency representatives and advisory councils in order to impact on funding priority-setting. Two-year colleges can no longer afford to maintain a reactionary posture with respect to state allocations and block grant funding. With the determination of the disbursement of these funds centralized at the state level, our institutions must be proactive in effecting how funds are to be distributed.

Within the state allotments shown on Attachment A in this section, each state must award at least 15 percent of the funds designated basic grants and program improvement to the postsecondary and adult education program. An additional 10 percent of the funds will be awarded to the handicapped; 20 percent to the disadvantaged.

As indicated on Attachments B and C, Development and Dissemination programs have been "blocked" — under the Omnibus Reconciliation Act. Contact State Advisory Councils through state agencies to determine where and how monies are, and will be, disbursed.

Attachment D, Adult Education, reflects the state allotments for fiscal year 1981 and for fiscal year 1982. This $86,400,000 is divided among the states according to the formula that is specified in the Adult Education Act which basically gives $150,000 to each state.

Additionally, each state receives an amount that is determined by the number of adults in the state eligible for Adult Education services.

Note: Programs under the Division of Adult and Vocational Education are forward funded. Fiscal year 1982 funds are being used for program (academic) year 1982-83 expenditures.

DEPARTMENT OF ENERGY — EDUCATIONAL PROGRAM DIVISION: Faculty Development Program funding continued in the fiscal year 1982 at a reduced level from the 1981 funding level. The number of awards to two-year colleges also declined. There are no funds set-aside specifically for two-year colleges under the Faculty Development Program. The administration has requested no money for this program during the 1983 fiscal year. As part of the proposed dispersion of D.O.E. to other departments, education programs will not be continued.

DEPARTMENT OF HEALTH AND HUMAN SERVICES: Funds available in the Department of Health and Human Services were markedly less in FY 1982 than in FY 1981 and FY 1980. The only funding for two-year colleges was Nursing Special Projects. Authorization for Nursing Capitation Funding for FY 1982 has been repealed, and there are no current plans to reinstate this program.

Nursing Special Projects have been authorized through FY 1984. Funding for FY 1982 was authorized at $10 million, but slightly more than $6 million was appropriated. Authorization for FY 1983 is $10.5 million. The program is on a quarterly continuing resolution pending passage of the FY 1983 Federal Budget. It is expected that a little over $5 million will eventually be appropriated. Both continuation grants and some new grants are anticipated under new funding priorities introduced in FY 1981 (P.L. 97-35). Two-year colleges can continue to compete for these funds.

It is expected that funds for Physician Assistant Training will be authorized and appropriated in FY 1983 but only for continuing projects with a proposal deadline of December 6, 1982. No money is expected to be appropriated in FY 1983 in Curriculum Development in Geriatrics, but authorization extends through FY 1984.

Expanded function for Dental Auxiliaries has no authorization for FY 1983 at this time.

The Bureau of Health Professions within the Health Resources Administration of the Department of Health and Human Services did not receive funding for vision care technician, radiology technician, medical laboratory technician, occupational therapist, environmental health technician, dental hygiene, medical records technician, respiratory therapy, dietetics, and training in emergency medical services (13.287). Emergency medical technician no longer exists. It has been subsumed by training emergency medical service. Furthermore, the Bureau does not expect to receive funding for any of these specialties in FY 1983. It is now operating on a continuing resolution pending passage of the federal FY 1983 budget.

The President's proposed budget now before congress proposes funding for Allied Health in three areas at $1 million each — Continuing Allied Health Education, Health Promotion and Disease Prevention, and Remote Clinical Sites. There is no indication what Congress will do with this proposal. The Bureau recognizes 148 Allied Health specialties. As of October 1, 1982, the Health Resources Administration (HRA) and the Health Service Administration (HSA) were combined into a new agency, Health Resources and Service Administration (HRSA). This agency will probably be moved from its present location at 3700 East-West Highway in Hyattsville, Maryland to the Parklawn Building at 5600 Fisher's Lane in Rockville, Maryland.

Office of Human Development-Administration on Aging — Division of Education and Career Preparation — All of Title IV (not just IV-A) is expected to be more than $21 million in FY 1983. Gerontology Career Preparation may be funded but not likely in excess of the $2.6 million allocated in federal FY 1982. The program may change significantly for federal FY 1983. The preliminary program announcement was published September 23, 1982, in the *Federal Register*. It is anticipated, that after the period for comments has expired, the final regulations will appear in a program announcement in December, 1982. It is expected the program will focus on two major areas: Targeting Professionals and Education for Older People. Interested members should watch for the *Federal Register* program announcement. There *may* be applications in this program that would be appropriate for two year institutions.

DEPARTMENT OF LABOR: The Job Corp Advanced Career Training Program (ACT) provides funding for person slots at colleges throughout the United States. The funds are distributed to and administered by ten Job Corps Regional Offices. A major portion of the funds are expended for training provided by community colleges. $7.8 million has been requested for FY 1983; however, funding for ACT is uncertain.

Comprehensive Employment and Training Act (CETA) expired at the end of FY 1982. The succeeding legislation embodies the "New Federalism" concept as it passes all control of the training programs to the states. The Department of Labor will award the funds to each state with the requirement that these funds be used to train economically disadvantaged citizens. All other administrative details such as eligibility determination, the structure of training programs, and evaluation will be formulated at the state level. Fiscal year 1983 will be a transitional year as the states decide how to terminate the present programs, implement the new programs, and maintain continuity. Funding levels will not be known until the new budget is adopted. By FY 1984, CETA's successor will be operating entirely from the state capitols, where the two-year colleges must make their impact.

NATIONAL ENDOWMENT FOR THE ARTS: The National Endowment for the Arts (NEA) is an independent agency created in 1965 to encourage and support American art and artists. NEA received a 1983 appropriation of $143,000,000, down from the record level of $158,560,000 for 1981. The Endowment awards grants to arts organizations and individuals through seventeen (17) different programs, some related to a single discipline, some inter disciplinary. Each of the programs provides assistance in several funding categories. Currently, there are more than 100 funding categories of Endowment assistance.

A system of peer review panels evaluates applications and develops the policies and programs for NEA. Funding from NEA must be matched fifty (50) percent by non-federal monies in most instances.

Traditionally, postsecondary institutions have not been major recipients of NEA funds. Two-year colleges have historically received less than ten awards annually. However, it must be noted that there are few applications submitted from two-year colleges, due in part to the criteria required in the various categories. All program categories were included in the report to indicate the low level of applications from two-year colleges. NEA has detailed data available for review.

The Endowment program coordinators expressed an interest in receiving proposals from two-year colleges. It was emphasized, however, that the Endowment will provide assistance in identifying appropriate programs for which two-year colleges may apply.

The NEA provides support for twelve full-time Regional Representatives who may be contacted for assistance. A list of the representatives is available upon written request to NEA.

NATIONAL ENDOWMENT FOR THE HUMANITIES: The NEH is an independent federal agency, created to support research, education, and public activity in the humanities as a result of a determination by Congress that federal funds should complement and assist the support for the humanities provided by state and local governments and private sources. Data reported are incomplete because NEH and other federal agencies had not yet received their fiscal year 1982 appropriation at the time of this publications preparation.

A great deal of support for community colleges was expressed by NEH staff. Richard Ekman, Director of the Education Programs Division, remarked that he views the large percentage of student credit hours in the humanities generated by two-year colleges as a mandate for the NEH to use community colleges to carry out the Endowment's own objectives. In fact, during FY 1982, community colleges received a total of 116 awards amounting to over $1,117,204. Approximately 20 percent of the community college applications to NEH were funded. Not all of the Endowment's programs award a significant proportion of grants to community colleges. Factors other than lack of interest often account for this, however, the most common explanation is the limited number of applications received from community colleges.

The Endowment's budget request for FY 1983 is $96,000,000, reduced from $130,560,000 appropriated during FY 1982. Under the new budget, a greater proportion of program funds (30%) would be devoted to matching support provided by non-federal sources, an increase from 25 percent of the total budget during previous years. Traditionally, these are programs with low community college participation — only 3 of 249 Challenge Grant proposals received in FY 1982 were from community colleges, and none of these received funding. However, the Challenge Grant program officer appears eager to encourage applications from community colleges.

Most of the NEH grants to two-year colleges fall in the Division of Education programs. During FY 1982, a total of thirty-three (33) grants of $890,302 were made to two-year colleges through twenty-two (22) Consultant Grants, eight (8) Pilot Grants, two (2) Implementation Grants, and one (1) Elementary Secondary Grant. In addition, in 1982, the latter program funded a contract with the AACJC for a series of conferences in "Strengthening Humanities in Occupational Curricula" in community colleges. This $135,000 contract supplemented a contract of $120,890 for similar conferences during FY 1981. Approximately 300 community college faculty members and administrators from 100 institutions participated in these conferences.

The Division of Education Programs is in the process of undergoing a major reorganization. One aspect of this reorganization would eliminate the Consultant, Pilot, and Implementation Grants after a transitional year during FY 1983. The substance of these changes can be found in the program's new guidelines, but these categories will be replaced by programs related to the following themes: "Improving Introductory Courses", "Promoting Excellence in a Field", and "Fostering Coherence Throughout an Institution." During 1983, the approved budget for education programs (the request is $10,700,000 a reduction from $14,301,000 appropriated in 1982) will be allocated flexibly to respond to needs that arise as a result of the transition.

The least promising division for community college applicants seems to be the Division of Research Programs. One of the objectives of this program is to contribute to knowledge in the humanities, and faculty from four year institutions have an inevitable advantage in this area. The ratio of community college to four year college grants is most favorable in the Summer Seminars for College Teachers programs. During the summer of 1982, two such seminars were offered exclusively for community college faculty.

NATIONAL INSTITUTE OF MENTAL HEALTH: The long range outlook is for significantly reduced appropriations. The nature of the guidelines for the program almost eliminate two-year colleges from funding. Only the most innovative programs have possibility for success.

Any applicant wishing to apply should first call to determine if the proposed project is feasible. The office of Grants Management at 301-433-3065 may be contacted for application forms, or the Division of Extramural Research Programs may be consulted for determining project feasibility. Fellowships must be clearly related to mental health and must be sponsored by an appropriate university. Generally, the above information applies also to NIMH alcohol and drug abuse programs. There are no funds available for clinical training and none are expected. Basically, both of these programs are moving to doctoral and post doctoral research programs.

NATIONAL SCIENCE FOUNDATION: The National Science Foundation appropriation for FY 1983 (the year beginning October 1, 1982) provides $30 million for science and engineering education, $15 million for graduate fellowships, and $15 million for "an activity at the pre-college level." This latter activity is expected largely to address inservice education of secondary school teachers of science and mathematics, but its precise nature is presently being determined. Announcements will be made widely through National Science Foundation's usual channels of communication.

The future of other National Science Foundation programs is uncertain, at best.
